

FEATURES

Introducing the new SPIC-50 Battery Charger.

- Designed and manufactured for OEM by Traction Direct
- Lithium Ca/Ca, Ca/Ag, AGM, GEL and conventional lead acid battery types covered
- Customisable Interface to battery BMS systems
- Customisable charge profiles
- 50A Constant output function for diagnostic support
- 3-stage charging: CI-CV-Float
- Short Circuit shutdown
- Reverse Polarity Protection
- Soft start
- Fast constant current bulk charge
- Constant voltage float/standby
- Features a customisable interface to the battery BMS system with LIN bus support
- Temperature adjusted charge profile for safe Lithium battery charging
- Output leads zero volts until the battery is connected and the charge process started
